## Product Description

This Battery label has been designed to satisfy the requirements of the British Standards as described below:

### BS 5266-1:2016 Clause 7.1 (Note 1) & 7.2.1 (Note) states...

It is important that batteries are correctly used, and at the end of life replaced with an equivalent and compatible battery type, to ensure that the performance of the emergency lighting is not affected.

### BS 5839-1:2017 Clause 25.4c states...

Labels should be fitted to all batteries indicating their date of installation and should be sited so that they can be read without disturbing the batteries.

### BS 5839-8:2013 Clause 26.3.3 states...

Labels should be fixed to all batteries indicating their date of installation. The labels should be so sited that they can be read without disturbing the batteries.

### BS 5839-9:2021 Clause 13.2e)2) states...

A label should be fixed to the battery indicating its date of installation. The label should be sited such that it can be read without disturbing the battery.

### BS 8629:2019 Clause 14.4c states...

Labels should be fitted to all batteries indicating their date of installation. The labels should be sited so that they can be read without disturbing the batteries.

## Product Specification

Product Code	FD-LAB-FDFA-BA
Labels per Pack	54
Label Size	22mm x 31mm
Label Material	Paper
